The Technical Report was prepared and filed in accordance with National Instrument 43-101—*Standards of Disclosure for Mineral Projects* ("NI 43-101").

As initially announced in its news release dated October 27, 2022, the maiden MRE for Osino's Ondundu Gold Project comprises 26 million tonnes (Mt) at an average grade of 1.13 g/t Au for a total of 0.9 million ounces (Moz) of gold in the Inferred mineral resource category (0.5 g/t cut-off). Ondundu is 100% owned by Osino and is located approximately 130 km northwest of Osino's flagship Twin Hills Project in Namibia. Osino completed the acquisition of Ondundu from B2Gold Corp. on July 21, 2022.

For additional information, please refer to the Technical Report available on the Osino website and filed on SEDAR under the Company's profile at www.sedar.com which contains more comprehensive technical information, which was also summarized in the Company's news release dated October 27, 2022.

The mineral resource estimate was carried out by Mr. Anton Geldenhuis (MEng), a registered Professional Natural Scientist (SACNASP, membership number 400313/04) of CSA Global (Pty) Ltd., who is an independent Qualified Person (QP) as defined by CIM Definition Standards for Mineral Resources and Mineral Reserves in accordance with NI 43-101. Mr. Geldenhuis is a geoscientist and is qualified as a geologist (Honours) and engineer (Masters) and has over 21 years of relevant industry experience. Mr. Geldenhuis is a member in good standing of the South African Council for Natural Scientific Professions (SACNASP) and has sufficient experience relevant to the commodity, style of mineralization and activity which he is undertaking to qualify as a QP under NI 43-101. Mr. Geldenhuis has reviewed and approved the scientific and technical information in this news release.

The Company also announces that it granted 3,862,800 stock options (the "Options") today to directors, officers, employees, and consultants of the Company today pursuant to its Stock Option Plan. The Options have an exercise price of \$0.90 per common share and expire 5 years after the date of grant pursuant to the terms of the Company's Stock Option Plan, which Options shall vest 1/3 on the date of grant, 1/3 12 months after the date of grant, and 1/3 24 months after the date of grant.

About Osino Resources

Osino is a Canadian gold exploration and development company focused on the fast-tracked development of our Twin Hills Gold Project ("Twin Hills") in central Namibia. Twin Hills is at an advanced stage of exploration and development with more than 220,000m of drilling completed on the project since its grassroots discovery by Osino with various advanced development studies underway.

Osino has a large ground position of approximately 6,900km² located within Namibia's prospective Damara sedimentary mineral belt, mostly in proximity to and along strike of the producing Navachab and Otjikoto Gold Mines. The Company is actively exploring a range of gold prospects and targets along the belt by utilizing a portfolio approach geared towards discovery, targeting gold mineralization that fits the broad orogenic gold model.

Our core projects are favorably located north and north-west of Namibia's capital city Windhoek. By virtue of their location, the projects benefit significantly from Namibia's well-established infrastructure with paved highways,

railway, power and water in close proximity. Namibia is mining-friendly and lauded as one of the continent's most politically and socially stable jurisdictions. Osino continues to evaluate new ground with a view to expanding our Namibian portfolio.
