

FOR IMMEDIATE RELEASE

OSINO ACHIEVES TWO MILLION LOST TIME INJURY-FREE HOURS AT TWIN HILLS

Osino Gold Exploration and Mining (Pty) Ltd is proud to announce that the Twin Hills Gold Project has achieved 2,000,000 work hours without a Lost Time Injury (LTI), marking another significant safety milestone as construction continues.

The achievement reflects the collective commitment of employees, contractors and project partners to maintaining the highest standards of health, safety and operational discipline.

"Reaching two million LTI-free hours is a testament to the strong safety culture that has been built across the Twin Hills Project," said Jon Kock, Project Director. "This milestone has been made possible through the vigilance, professionalism and teamwork of every individual working on site. We thank everyone for their commitment to ensuring that safety remains at the centre of everything we do."

As Twin Hills progresses towards becoming Namibia's next gold mine, Osino remains committed to protecting the wellbeing of its workforce through continuous training, proactive risk management and a shared responsibility for safe work practices.

While celebrating this achievement, the company emphasises that safety is an ongoing commitment. Every task, every shift and every decision contributes to the ultimate goal of ensuring that everyone returns home safely at the end of each day.

ABOUT OSINO GOLD EXPLORATION AND MINING (PTY) LTD.

Osino Gold Exploration and Mining (Pty) Ltd. ("Osino"), owned by Shanjin International Gold Co., Ltd. ("Shanjin"), is a leading exploration and development company in Namibia. The company holds approximately 5,400 km² of exclusive prospecting licences (EPLs). While continuing to advance several gold prospects along the belt, Osino's primary focus is the development of the Twin Hills Gold Project in central Namibia. Guided by its commitment to responsible mining, the company works collaboratively with government, communities and local stakeholders to create lasting social and economic value alongside the development of one of Namibia's newest gold mines.
