

FOR IMMEDIATE RELEASE

OSINO RELEASES OCTOBER 2026 NEWSLETTER

Windhoek, Namibia – October 2026: Osino Gold Exploration and Mining is pleased to share the October 2026 edition of Resource Review, our stakeholder newsletter.

In this edition, we take a closer look at the changing skyline of the Twin Hills Gold Project as construction progresses towards planned gold production in 2027. With major structures rising across the processing plant and essential infrastructure taking shape, the transformation from construction site to future operating mine is becoming increasingly visible.

We also share the release of our 2025 Sustainability Report and 2025 Twin Hills Trust Annual Report, highlighting our performance in responsible mine development, environmental management, local economic participation, and community investment.

Our environmental update explores the findings of the latest Khan River vegetation monitoring survey, which is helping us better understand the river ecosystem and establish a reliable baseline for future monitoring.

Through Resource Review, we aim to keep our stakeholders informed about our progress, priorities, and commitment to creating lasting value for Namibia.

ABOUT OSINO GOLD EXPLORATION AND MINING (PTY) LTD.

Osino Gold Exploration and Mining (Pty) Ltd. ("Osino"), owned by Shanjin International Gold Co., Ltd. ("Shanjin"), is a leading exploration and development company in Namibia. The company holds approximately 5,400 km² of exclusive prospecting licences (EPLs). While continuing to advance several gold prospects along the belt, Osino's primary focus is the development of the Twin Hills Gold Project in central Namibia. Guided by its commitment to responsible mining, the company works collaboratively with government, communities and local stakeholders to create lasting social and economic value alongside the development of one of Namibia's newest gold mines.
