

FOR IMMEDIATE RELEASE

TWIN HILLS GOLD PROJECT ACHIEVES FOUR MILLION LTI-FREE WORK HOURS

Windhoek, Namibia, 9 November 2026 – Osino Gold Exploration and Mining (Pty) Ltd is proud to announce that the Twin Hills Gold Project has achieved 4,000,000 work hours without a Lost Time Injury (LTI), marking another significant safety milestone as construction continues to progress.

Building on the previous milestone of two million LTI-free hours, this achievement reflects the ongoing commitment of employees, contractors and project partners to maintaining high standards of health, safety and operational discipline across the project. From following established procedures and proactively identifying hazards to looking out for one another, every individual on site has contributed to this collective achievement.

As construction advances towards completion in 2027, Osino remains committed to strengthening its safety culture through proactive risk management, continuous improvement and adherence to safe working practices. The company extends its sincere appreciation and congratulations to all employees, contractors and project partners who have contributed to this achievement.

While four million LTI-free hours is an important milestone, the ultimate goal remains unchanged: zero harm and ensuring that everyone returns home safely at the end of each day.

ABOUT OSINO GOLD EXPLORATION AND MINING (PTY) LTD.

Osino Gold Exploration and Mining (Pty) Ltd. ("Osino"), owned by Shanjin International Gold Co., Ltd. ("Shanjin"), is a leading exploration and development company in Namibia. The company holds approximately 5,400 km² of exclusive prospecting licences (EPLs). While continuing to advance several gold prospects along the belt, Osino's primary focus is the development of the Twin Hills Gold Project in central Namibia. Guided by its commitment to responsible mining, the company works collaboratively with government, communities and local stakeholders to create lasting social and economic value alongside the development of one of Namibia's newest gold mines.
